Subject: Animas Background/Data

Hi, Dan.

It sounds like you're the guy who has the background information for the Animas River work. I'm not sure of what all is out there, but I have some information from previous site work. From a brief review, I have and need (or might need) the following information.

I have the following:

● USGS compendium of papers, 2002 (hard copy, and the electronic copy is available on the web)

● Excel spreadsheets and map I got from Steve Way sometime last year, maybe from ESAT:

o   CC Locations.xlsx

o   CC_data.xls

o   Combined Water Qual DataMay7, 2013.xls

o   Directions_Codes_Site_Keys.xls

o   Loading CC18-Temp.xlsx

o   Loading tables.xlsx

o   UA Crosstabs.xlsx

o   UpperAnimas_CementCreek_2012Jan_48x36.pdf

o   ARSG data (from their website, plus I have the older data (pre-2005) in a database from old START work)

● Risk Assessment Status and Results (from ARSG website) – it would be nice to have the data that was based on if it's available and different from the data described above

- Animas Scribe database (hopefully I'm getting this through John Lucotch – I'll let you know if I need you or Steve to arrange a subscription).

I need the following:

- Animas UAA

- Animas TMDLs

- USGS tracer data/OTEQ work

- DRMS data from 90s (and other data if available)

- USFS work?

- Owen, Robert J. 2006. Gladstone Area Mine Drainage Analysis. Report for ARSG meeting.

- Anything else you know about that might be helpful

Let me know if you think any of these are unhelpful or if you want me to pursue getting them.
